ciriza7@aol.com —

Congratulations on your new location! I travel from California to see Dr. Hammond, Last year he preformed a blephorplasty to remove excess skin from my eyes. I had minimal bruising and it was only a matter of weeks that my life returned to normal. I am so grateful for Dr. Hammond's and look forward to my annual check-ups.

Ophthalmologists is a physician who specializes in eye and vision care. He/she is medically trained to deliver total eye care: primary, secondary and tertiary (i.e., vision services, contact lenses, eye examinations, medical eye care and surgical eye care), diagnose general diseases of the body and treat ocular manifestations of systemic diseases. Patients having eye problems like bulging of one or both eyes; dark curtain or veil that blocks vision; decreased vision, even if temporary; distorted vision; double vision; excess tearing; eyelid abnormalities; family history of eye disease; halos (colored circles around lights); injury to the eye; loss of peripheral (side) vision; misaligned eyes; new floaters (black "strings" or specks in the vision) and/or flashes of light; pain in the eye; thyroid disease-related eye problems (Graves' disease); unusual red eye; high blood pressure related eye problems; diabetes mellitus related eye problems; HIV or AIDS patients who can have eye problem in future need to consult an ophthalmologist as soon as possible to save their sight.

Patients can choose an eye specialist sub speciality from below:

- Ophthalmologists (//eyedoctor.io/ophthalmologists/)
- · Optometrists (//eyedoctor.io/optometrists/)
- · Eye Clinics (//eyedoctor.io/clinics/)
- · Vision Centers (//eyedoctor.io/vision-center/)
