Customer Comments	Technician Comments
customer states check engine light is on, also airbag light as well, customer is primarily concerned with the check engine light to pass emissions;	During Diagnosis the following codes were found:P2a00; verified concern, found passenger side catalytic converter failed, when attempting to replace converter, noticed that one of the mounting bolts/nuts was rusted/corroded, and siezed onto exhaust manifold assembly, sublet out to professional muffler shop, and muffler shop determined that convertor will not be able to be replaced without the exhaust manifold bolt breaking, recommend taking vehicle to dealership.
