

# Summary of your answers

Questionnaire completed on 11/25/2023, 11:36 AM UTC

Pfizer Inc. ("Pfizer"), which manufactures and sells oral prescription medication for COVID-19, has contracted with Ada Health Inc. ("Ada") for the development, hosting and operation of the questionnaire you completed. The questionnaire is intended to educate individuals about whether they meet current criteria for high risk for progression to severe COVID-19 and whether oral prescription medication for COVID-19 may be appropriate.

The questionnaire is not intended to influence the choice of treatment for severe COVID-19, and Pfizer has not made or offered any payment to Ada to influence the referral of patients to any Pfizer product. All decisions regarding patient care must be made in consultation with a healthcare professional, considering the unique characteristics of the patient. The health information contained herein is provided for educational purposes only and is not intended to replace discussions with a healthcare professional.

Pfizer will not receive any personal information relating to respondents or any of your individual responses. Ada will share with Pfizer only aggregated information related to responses to the questionnaire.

The questionnaire is only for US residents aged 18 or over. All guidance and recommendations follow current [CDC](#)<sup>1</sup>, [FDA](#)<sup>1</sup>, and [NIH](#)<sup>1</sup> guidelines. If you have health concerns, talk to your healthcare professional. In a medical emergency, call 911.

## Information you provided

The following information may not be comprehensive. A person's risk of progression to severe COVID-19 increases with the number of underlying medical conditions.

- 65 years or older

## COVID-19 status you provided

- No test taken for COVID-19
- Has 1 or more of the following symptoms: - Fever or chills - Cough - Shortness of breath or breathing difficulties - Fatigue - Muscle or body aches - Headache - New loss of taste or smell - Sore throat - Congestion or runny nose - Nausea or vomiting - Diarrhea
- Symptoms started over 5 days ago

## Conclusion given

**Your answers indicate you meet current criteria for being at high risk for progression to severe COVID-19 but are not eligible for oral prescription medication for COVID-19 at this time.**

Risk of severe illness from COVID-19 increases according to the number of underlying medical conditions a person has.

Oral prescription medications for COVID-19 are intended for people who:

- have been diagnosed with COVID-19, and
- have mild-to-moderate symptoms of COVID-19 that started within the last 5 days, and
- are at high risk of progression to severe illness.

If you are currently hospitalized due to severe COVID-19 or receiving supplemental oxygen as part of COVID-19 treatment, discuss the best treatment option with your healthcare professional.

## Guidance given

**If your symptoms started more than 5 days ago, speak to a healthcare professional to find out if a different treatment might be right for you. Visit the CDC's [website](#) to learn more. Talk to a healthcare professional if your symptoms fail to ease or worsen.**
